

RX2300

DUAL-POSITION ROPE TRAINER

STRENGTH INDURANCE COORDINATION SPEED

ROPEFLEX®

Ropeflex delivers the benefits of both isokinetic and aerobic exercise. Our rope-pulling machines are based on simple, time-proven principles of rope climbing while reducing the risk of this traditionally dangerous activity to nearly zero. Individuals of any age and athletic ability can benefit from our unique rope technology safely and comfortably.

Ropeflex training equipment is based on maintenance-free magnetic technology. Our continuously adjusting resistance mechanism causes the rope pulling difficulty to increase with the rope pulling speed. Our patented technology allows you to customize the workout to match your fitness goals. Initial tension can start as low as 10 lbs and go up to 200 lbs (on select models) for performance athletes or those who want to maximize resistance training. Our high quality ropes allow a comfortable grip, limiting friction and slipping during the exercise activity.

STANDARD FEATURES

- Safe alternative to ceiling rope - vertical and horizontal rope trainer
- Durable, compact and light-weight design
- Soft-braided rope for easy and comfortable grip
- Cushioned seat and back support for various workout routines
- Magnetic / bidirectional mechanism with automatically adjustable resistance
