

Ropelflex delivers the benefits of both isokinetic and aerobic exercise. Our rope-pulling machines are based on simple, time-proven principles of rope climbing while reducing the risk of this traditionally dangerous activity to nearly zero. Individuals of any age and athletic ability can benefit from our unique rope technology safely and comfortably

Ropelflex training equipment is based on maintenance-free magnetic technology. Our continuously adjusting **PROGRESSIVE RESISTANCE** automatically increases or decreases resistance depending on rope pulling speed and intensity. Our patented technology allows you to customize the workout to match your fitness goals. Initial tension starts as low as 10 lbs and goes up to 200 lbs. A perfect training machine for beginners to performance athletes. Our high quality ropes are pliable, allowing for a comfortable grip, limiting friction and slippage during exercise.

STANDARD FEATURES

- Safe alternative to ceiling rope - beam mountable rope trainer drum
- Durable, compact construction design to attach to existing racks
- Soft-braided rope for easy and comfortable grip
- Magnetic / bidirectional mechanism with automatically adjustable resistance
- Available sealed outdoor configuration
