

Ropeflex training machines are based on simple, time-proven principles of rope climbing while reducing the risk of this traditionally dangerous activity to nearly zero. Individuals of any age and athletic ability can benefit from our unique rope technology safely and comfortably.

Ropeflex friction based equipment is durable, maintenance free and is made 100% in the United States. All parts are painted with polymer based powder coat for a long lasting finish. Our high quality ropes allow a comfortable grip, limiting friction and slipping during the exercise activity.

FRAME / UPHOLSTERY	
Frame finish	Powder coat
Frame color	
Upholstery color	Not applicable
Machine Weight	18 lb / 8 kg

TECH SPECS
